

INSTAGRAM GROWTH PLAN

Instagram Growth Intelligence Report

A 30-day action plan to improve visibility, trust, content, and local lead flow — built from your own account, your market, and the accounts already winning in your space.

46 /100 POWER LEVEL TODAY
YOUR NEXT 30 DAYS ARE MAPPED INSIDE

@botlogix · BotLogix - AI Solutions · Marketing agency · Burlington, Halton

Prepared by BotLogix · 2026-05-31 · Review on June 27, 2026

How to Use This Guide

This is a field guide, not a one-time report. Keep it open beside you while you work.

The three steps, in order:

1. **Fix the profile first** — it's the front door; everything else sends people to it.
2. **Publish the next 7 days** — momentum beats perfection.
3. **Repeat what earns saves, replies, comments, and profile visits** — let the data pick your winners.

Do not try to do everything. Start with the highest-leverage moves. This guide ranks every recommendation by **impact, difficulty, speed, and business value** so you always know what to touch next.

The Short Version

Your account is not broken — it is under-signalled. Most of the upside is still on the table.

Biggest opportunity	Lock in Burlington/Halton local discovery across profile + posts
Biggest weakness	Local visibility (0/100) — terms checked: burlington, halton, hamilton, greater toronto area
Fastest win	Run a tight link-in-bio A/B test aligned to your best post type
30-day target	More findable, a clearer profile, more useful content, and an obvious next step for buyers

This is the whole plan in one glance. The rest of the guide proves it and shows you exactly how.

Where You Stand Today

Your full diagnostic picture. These are decision tools, not vanity numbers — each one tells you whether to leave it alone or fix it now.

Band	Meaning
80–100	Strong asset — protect it
60–79	Usable — needs refinement
40–59	Underperforming — improve soon
0–39	Fix first — biggest leverage

Overall  **46/100** — *Underperforming*

Profile conversion  **55/100** — *Underperforming*

- *What it means:*  Botlogix helps small businesses use AI, agents, and workflows to save time, i
- *Why it matters:* A visitor decides in seconds whether to follow or leave.
- *Changes it fastest:* A/B test the link-in-bio destination and pinned posts.

Content performance  **50/100** — *Underperforming*

- *What it means:* 1 posts in last 30 days (~0.23/wk)
- *Why it matters:* Saves and shares drive reach far more than likes.
- *Changes it fastest:* Double down on your best format and cut low performers.

Local visibility  **0/100** — *Fix first*

- *What it means:* terms checked: burlington, halton, hamilton, greater toronto area
- *Why it matters:* Discovery depends on clear category + location signals.
- *Changes it fastest:* Add city + category to the name field, captions, and geotags.

Sales readiness  **56/100** — *Underperforming*

- *What it means:* 35/50
- *Why it matters:* Attention is wasted without an obvious next step.
- *Changes it fastest:* Add proof posts and a pinned how-to-buy/how-to-start.

Competitor gap 70/100 — Usable — needs refinement

- *What it means:* client=0.23/wk ref=2.24/wk
 - *Why it matters:* You're judged against active accounts in your space.
 - *Changes it fastest:* Differentiate with a signature format competitors don't use.
-

What the Numbers Mean

A quick lesson in reading your own account. Five indicators decide whether Instagram shows you — and whether buyers act.

LOCAL VISIBILITY — 0/100 (FIX FIRST)

- **What we measured:** terms checked: burlington, halton, hamilton, greater toronto area
- **What your number means:** The biggest constraint on your growth right now.
- **Why Instagram cares:** Instagram needs clear category + location signals to know who to show you to.
- **Why buyers care:** Buyers search and browse locally — if you're invisible there, you're invisible to them.
- **What to do next:** Add city + category to the name field, captions, and geotags.

PROFILE CONVERSION — 55/100 (UNDERPERFORMING)

- **What we measured:** 🟦 Botlogix helps small businesses use AI, agents, and workflows to save time, i
- **What your number means:** Underperforming — real upside if you act.
- **Why Instagram cares:** A clear profile keeps people on your page, which tells Instagram you're worth surfacing.
- **Why buyers care:** A visitor decides in seconds whether to follow or leave.
- **What to do next:** A/B test the link-in-bio destination and pinned posts.

CONTENT PERFORMANCE — 50/100 (UNDERPERFORMING)

- **What we measured:** 1 posts in last 30 days (~0.23/wk)
- **What your number means:** Underperforming — real upside if you act.
- **Why Instagram cares:** Saves and shares drive reach far more than likes.
- **Why buyers care:** Useful content is what earns the follow and the eventual enquiry.
- **What to do next:** Double down on your best format and cut low performers.

SALES READINESS — 56/100 (UNDERPERFORMING)

- **What we measured:** 35/50

- **What your number means:** Underperforming — real upside if you act.
- **Why Instagram cares:** Profiles with an obvious next step convert attention the algorithm sends you.
- **Why buyers care:** Attention is wasted without an obvious way to take the next step.
- **What to do next:** Add proof posts and a pinned how-to-buy/how-to-start.

COMPETITOR GAP — 70/100 (USABLE — NEEDS REFINEMENT)

- **What we measured:** client=0.23/wk ref=2.24/wk
 - **What your number means:** A working asset you can build on.
 - **Why Instagram cares:** Active, differentiated accounts get rewarded over copycats.
 - **Why buyers care:** You're judged against the accounts buyers already follow.
 - **What to do next:** Differentiate with a signature format competitors don't use.
-

The Growth Diagnosis

You do not have one Instagram problem. You have a sequence problem. People have to move through five stages — and you're only as strong as your weakest one.

Stage	The question	Your score	Status
1. Get found	Can the right local people discover you?	0/100	Fix first
2. Make sense fast	Does your profile explain who you help in seconds?	55/100	Underperforming
3. Be worth following	Is your content useful enough to save and follow?	50/100	Underperforming
4. Stand out	Do you look different from every other account in your space?	70/100	Usable — needs refinement
5. Drive action	Is there an obvious next step for someone ready to buy?	56/100	Underperforming

The break in your chain is "Get found". Traffic leaks out there first, so that's where this plan starts. Fix the earliest weak stage and every stage after it gets easier.

What Your Competitors Are Teaching Us

We studied **472 real posts** and pulled the accounts already winning in your space. The point isn't to copy them — it's to see what the market is already rewarding.

Account	Type	Followers	Format	Best thing to learn
@awanidigitals	Local	1,107	image	Their image + hook structure
@allthesethingsagency	Local	1,076	carousel	Their carousel + hook structure
@shri_digital	Reference	1,797	reel	Their reel + hook structure
@socialdigital_services_	Reference	10,644	reel	Their image + hook structure
@sldigitalmarketingofficial	Reference	3,214	reel	Their reel + hook structure
@vitamindmarketing	Local	1,356	reel	Their image + hook structure

Do not copy their creative or captions word-for-word. Borrow the *structure* — the format, the hook style, the cadence — and rebuild it in your own voice.

Five Lessons From the Market

Translating the data into moves you can make this week.

1. The market leads with reel content

- *Why it works:* reel earns the most reach in your category right now.
- *How to adapt it:* Make reel your default format — at least one per week.
- *First post idea:* A reel walking through one common question your buyers ask.

2. Winning posts open with a description hook

- *Why it works:* description openers stop the scroll and set up the payoff.
- *How to adapt it:* Write your first line as a description, then deliver one concrete takeaway.
- *First post idea:* "Here's what most Burlington buyers get wrong about marketing agency"

3. Top accounts emphasize customer focus

- *Why it works:* Content that centres the customer (not the brand) gets saved and shared.
- *How to adapt it:* Frame posts around the buyer's problem, not your services.
- *First post idea:* A before/after or a "mistake I keep seeing" post about your customers' situation.

4. Consistency beats intensity

- *Why it works:* The accounts ahead of you simply post on a steady rhythm.
- *How to adapt it:* Pick a cadence you can keep for 30 days and hold it.
- *First post idea:* Batch three posts this weekend so next week is already done.

5. Every post points somewhere

- *Why it works:* Reach without a next step doesn't convert.
 - *How to adapt it:* End every caption with one clear action: "Book a free quote".
 - *First post idea:* A post whose only job is to get the reader to book a free quote.
-

What the Market Is Rewarding

How you stack up against 472 posts in your category — with the action for each gap.

Metric	You	Market	What to do
Posts / week	0.2	2.2	Raise cadence to a rhythm you can keep.
Avg caption length	669 chars	320 chars	Tighten the first line; move detail lower.
Avg hashtags / post	16.9	5.8	Fewer, more intentional tags (local + intent + authority).
Top format	image	reel	Match the market's working pattern.

Read: Raise your posting rhythm. You post 0.2×/week vs a market average near 2.2×. Build a repeatable weekly cadence so the algorithm and your audience see you consistently.

Proven pattern in your category: reel-first content, opening with a description hook, centred on customer focus. Make that your default and you're aligned with what already works.

Content Pattern Recipes

Four formulas to keep beside you when you post. Fill in the brackets and publish.

EDUCATIONAL PROOF POST

- **When to use it:** When you want to build authority.
- **Opening line:** "Here's what I'd check first if you're choosing a marketing agency in Burlington."
- **Structure:** Hook → 3 quick points → one concrete takeaway → CTA.
- **CTA:** Book a free quote
- **Example idea:** A short teach on the #1 thing buyers overlook.

LOCAL FAQ POST

- **When to use it:** When you want local discovery.
- **Opening line:** "Burlington buyers ask me this all the time..."
- **Structure:** Question → plain-English answer → local proof → CTA.
- **CTA:** Book a free quote
- **Example idea:** Answer the single most common question you get, tagged to Burlington.

CUSTOMER OBJECTION POST

- **When to use it:** When you want replies and DMs.
- **Opening line:** "'It's too expensive / too early / not for me' — let's talk about that."
- **Structure:** Objection → why it's understandable → the reframe → CTA.
- **CTA:** Book a free quote
- **Example idea:** Turn your most common objection into a first-line hook.

PROOF / CASE-STUDY POST

- **When to use it:** When you want trust.
- **Opening line:** "Here's what changed for a Burlington client in 30 days."
- **Structure:** Before → what you did → result → CTA.
- **CTA:** Book a free quote

- **Example idea:** One real result (anonymised if needed) told as a mini story.
-

The Local Visibility Plan

Local growth is not one trick. It is repeated context. Burlington should appear naturally everywhere a buyer or the algorithm looks.

Profile signals

- Put "Marketing agency" + Burlington in your name field and the first line of your bio.
 - Make your link point to the single highest-value next step. **Post signals**
 - Add a Burlington location tag to every post.
 - Drop one natural local line in each caption ("Serving Burlington & nearby"). **Search signals**
 - Lead with your local hashtag set: #burlingtonontario #haltonregion #haltonhills #oakvilleontario #torontobusiness #ontariobusinessowners **Community signals**
 - Engage with the accounts local businesses tag: @dose.of.beth, @asicstennis, @gudzdesigns, @barlowcommunity, @shoregrillandgrotto, @tavaresrealestate. **Proof signals**
 - Pin a "how I help Burlington" post and save Highlights for Services, Proof, and FAQ.
-

Profile Fix Blueprint

Your first fix, made dead simple. The profile is the front door — get this right before anything else.

Before (today):

- Name: BotLogix - AI Solutions
- Bio:  Botlogix helps small businesses use AI, agents, and workflows to save time, improve follow-up, and build smarter systems.
- Issues: Bio lacks a clear who/offer/CTA; Missing city/category signals

After (recommended structure):

```
Line 1: Who you help  
Line 2: Where you help them (Burlington + nearby)  
Line 3: The problem you solve  
Line 4: CTA – Book a free quote
```

Worked example:

```
Helping Burlington people searching for help in this category get a better result  
Serving Burlington, Halton  
Products/services in the "Marketing agency" space  
Book a free quote – link below
```

The Five Moves That Matter Most

Ranked by leverage. Do them in order — each makes the next one land harder.

1. LOCK IN BURLINGTON/HALTON LOCAL DISCOVERY ACROSS PROFILE + POSTS

Impact	Effort	Time	Expected	When
high	medium	60 min	+10 local reach	This week

Why this matters: Local visibility scored 0, meaning Instagram has weak signals for Burlington/Halton buyers. Adding clear location + category signals increases who sees your content when people search or browse locally.

Do this: 1) Edit Instagram display name to: "BotLogix - AI for Small Business | Burlington". 2) Update every post caption to include one local line near the end: "Serving small businesses in Burlington & Halton." (keep it natural). 3) Add location tags on every new post: "Burlington, ON" or "Halton" (choose one and stay consistent).

Track: local reach / profile visits

2. CREATE 2 PINNED “HOW-TO-BUY/START” POSTS TO CONVERT BETTER

Impact	Effort	Time	Expected	When
high	medium	3 hours	+15 profile conversion	Week 1

Why this matters: Sales readiness is 56/100; visitors likely understand what you do but don't have an obvious next step. Pinned guides reduce friction and increase follower-to-lead conversion.

Do this: Create and pin these two posts: Post 1 (carousel): "How to get AI workflows working for your business (7 steps)" with slides: 1) Pick a workflow (follow-up, lead capture, inbox, scheduling) 2) Map current steps 3) Choose the agent/tool 4) Set rules 5) Connect data 6) Test with real messages 7) Measure time saved. Post 2 (reel or carousel): "What BotLogix does in your first week" with slides/frames: audit → workflow design → automation setup → follow-up messaging system → handoff + next steps. Then pin both posts at the top of your profile and add a final line on each: "Learn more at botlogix.ca".

Track: link taps / DMs

3. RUN A TIGHT LINK-IN-BIO A/B TEST ALIGNED TO YOUR BEST POST TYPE

Impact	Effort	Time	Expected	When
medium	low	45 min	+8 profile conversion	Week 1

Why this matters: Profile conversion is 55. The link-in-bio is the bottleneck for turning interest into site visits/leads. A/B testing the destination and pinned-post order can quickly improve conversion without changing your posting cadence.

Do this: A/B test for 14 days: Variant A: Link-in-bio points to <https://botlogix.ca> homepage. Variant B: Link-in-bio points to the most relevant landing page on your site (if you have one for AI workflows/agents). If you don't have separate pages, create a single new section page on your site titled "AI Workflows for Small Businesses" and link to that. Also pin order:

- First pin: the best-performing format you currently have (carousel or reel—use what your insights show).
- Second pin: the other guide. Keep everything else unchanged during the test.

Track: profile visits → follows

4. ADOPT A SIGNATURE CONTENT FORMAT THAT DIFFERENTIATES FROM COMPETITORS

Impact	Effort	Time	Expected	When
medium	medium	2 hours (setup + first post), then 45 min/post	+12 content performance	Weeks 2–3

Why this matters: Competitor gap is 70, meaning you have room to win. A signature format makes your account instantly recognizable and improves saves/shares versus generic "AI tips."

Do this: Launch a recurring series you can sustain: Series name: "AI Workflow Fixes (Burlington/Halton Edition)". Format per post (carousel, 6 slides):

1. The common problem (e.g., "Leads go cold after Instagram DM").
2. What's happening now.
3. The workflow (agent steps in plain language).
4. The exact follow-up messages (include 2-3 sample lines).
5. Time saved / benefit in business terms.
6. Where to start: "See examples at botlogix.ca". Use the local audience line: "Built for small businesses in Burlington & Halton."

Track: profile visits → follows

**5. INCREASE CONTENT DEPTH WITHOUT INCREASING POSTING FREQUENCY:
OPTIMIZE THE NEXT 2 POSTS**

Impact	Effort	Time	Expected	When
medium	low	45 min per post	+8 content performance	Weeks 2–3

Why this matters: Content performance is 50 and activity is low (about 0.2 posts/week). Since you’re already below market average, the highest leverage is improving per-post conversion and shareability—not simply posting more often.

Do this: For your next two posts, do this checklist:

- 1. Hook in first line (problem + outcome): “If your Instagram DMs aren’t turning into booked calls, here’s the workflow fix.”
- 2. Add an “Example outputs” section (show 2 example follow-up messages or a mini workflow diagram in text).
- 3. End with an intent-based, non-salesy line that drives to your site: “See workflow examples at [botlogix.ca](#).”
- 4. Use consistent local phrasing: “for Burlington & Halton small businesses.”
- 5. Ensure captions are scannable (short paragraphs, 1 emoji per section max).

Track: saves + shares

Your First 7 Days

Small daily blocks — 15–30 minutes — that stack into a finished foundation by day 7. Check each off as you go.

☐ Day 1 — Lock in Burlington/Halton local discovery signals (15-30 min)

- 1. Go to your Instagram profile and change the display name to: "BotLogix - AI for Small Business | Burlington".
- 2. Create a reusable caption footer line (paste-ready): "Serving small businesses in Burlington & Halton."
- 3. Decide one consistent location tag you'll use most often for posts today: "Burlington, ON" OR "Halton" (pick one and commit).
- *Why this matters:* Local visibility is currently weak; stronger Burlington/Halton signals improve who sees your content in local search and browsing.
- *Done when:* Your display name is updated and you have a finalized caption footer line plus a chosen primary location tag for consistency.

☐ Day 2 — Build conversion-ready pinned posts (part 1: assets) (15-30 min)

- Write the 7-slide carousel body in your notes using this exact structure (one line per slide, simple language): Slide 1: How to get AI workflows working for your business (7 steps) Slide 2: Pick the workflow you need (follow-up, lead capture, inbox, scheduling) Slide 3: Map your current steps (what happens today) Slide 4: Choose the right agent/tool for the job Slide 5: Set clear rules (what it should do, what it should not do) Slide 6: Connect your inputs (data + messages) and test with real examples Slide 7: Measure the time saved and tighten follow-up Finish the caption with: "Serving small businesses in Burlington & Halton." and a natural line: "Learn more at botlogix.ca".
- *Why this matters:* Pinned guides reduce friction for small business owners who want an obvious starting point, improving profile conversion.
- *Done when:* All 7 slide lines + a ready-to-paste caption footer and CTA are drafted.

☐ Day 3 — Build conversion-ready pinned posts (part 2: assets) (15-30 min)

- Create a script or slide list for this post in your notes: Title: What BotLogix does in your first week Frame/Slide order:
 1. Audit: we review how your leads and follow-up work today
 2. Workflow design: we map the steps and where AI agents fit

3. Automation setup: we build the workflow for real messages
 4. Follow-up system: we generate consistent, on-brand replies
 5. Handoff + next steps: you know what's running and what to improve next Add a caption ending with: "Built for small businesses in Burlington & Halton." and "Learn more at botlogix.ca".
- *Why this matters:* This clarifies what you do and what the customer gets quickly, which is a common conversion gap for marketing-service accounts.
 - *Done when:* Your first-week post script/slide outline + caption with local line and site CTA is ready.

□ Day 4 — Publish pinned posts (15-30 min)

- 1. Publish the carousel for "How to get AI workflows working for your business (7 steps)" with the draft text from Day 2.
 - 2. Add location tag(s) to the post using your chosen primary tag (Burlington, ON OR Halton).
 - 3. Pin this post to the top of your profile.
 - 4. Publish the reel or carousel for "What BotLogix does in your first week" using the draft text from Day 3.
 - 5. Add the same primary location tag.
 - 6. Pin the second post under it so visitors see both immediately.
 - 7. Confirm both posts include the line "Serving small businesses in Burlington & Halton." (or the exact local phrasing you used).
- *Why this matters:* Pinned content increases the chance a visitor immediately understands the next step and how it works for their business.
 - *Done when:* Both posts are live and pinned at the top of your profile in a clear order.

□ Day 5 — Set up a local signature format to improve per-post performance (15-30 min)

- Draft the first post using this exact template (carousel, 6 slides): Slide 1: AI Workflow Fixes (Burlington/Halton Edition) Slide 2: Common problem: "Your Instagram DMs don't turn into booked calls." Slide 3: What's happening now (no consistent follow-up; slow replies; messages that don't move people) Slide 4: The workflow fix (plain language steps) Step A: Route new DMs into a simple workflow Step B: Classify intent (hot/warm/cold) Step C: Send a follow-up sequence with rules and timing Step D: Escalate only when ready Slide 5: Example follow-up messages (2-3 short lines) Example 1: "Thanks for reaching out—quick question: are you looking to start with DMs, forms, or both?" Example 2: "If you share your current offer, I can suggest a simple workflow to speed up follow-up." Slide 6: Where to start: "See examples at botlogix.ca" Caption end: "Built for small businesses in Burlington & Halton."

- *Why this matters:* A recognizable series helps your account stand out versus generic AI tips, boosting saves/shares and returning visitors.
- *Done when:* A complete draft for the first signature-format carousel is ready to publish.

□ Day 6 — Improve conversion via link-in-bio A/B test setup (15-30 min)

- Choose your 14-day test setup and prepare the two destinations: Variant A destination: <https://botlogix.ca> (homepage) Variant B destination: If you have a dedicated landing page for AI workflows/agents, set Variant B to that exact URL. If you do not have one, write down the URL you will create and use (new page name to create later): "AI Workflows for Small Businesses". Also decide your pinned order rule for the test:
- Pin #1: the best-performing current format you have (carousel or reel).
- Pin #2: the other guide. Do not change anything else yet—just confirm the two destinations you will test and the pinned order you'll keep constant during the 14 days.
- *Why this matters:* Profile conversion is the bottleneck; A/B testing the link destination and keeping pinned posts constant helps you identify what turns interest into clicks.
- *Done when:* You've selected the exact Variant A URL and Variant B URL (or identified that Variant B requires a specific new page URL you'll create).

□ Day 7 — Publish signature-format post + ensure scannable, local, conversion-ready copy (15-30 min)

- 1. Publish the carousel drafted on Day 5.
 - 2. Add the primary location tag consistently (Burlington, ON OR Halton).
 - 3. In the caption, keep it scannable: short lines, no big blocks.
 - 4. Include one natural local line near the end: "Serving small businesses in Burlington & Halton."
 - 5. End with a non-pushy site line: "See examples at botlogix.ca".
 - 6. Double-check that your first line (opening sentence) states the outcome/problem in plain language (DMs to booked calls).
 - *Why this matters:* This combines differentiation (signature series) with local relevance and a low-friction next step, improving saves, shares, and downstream site visits.
 - *Done when:* The signature-format post is live with clean scannability, local signaling, and a clear site destination.
-

Days 8–14 — Build Proof & Trust

Theme: Build repeatable content and trust signals.

- ☐ Publish 3–4 posts
- ☐ Use the market's top format once
- ☐ Add hooks + hashtags every post

Goal: Post with a rhythm · *Output:* Consistent week of content

Track: Profile visits · DMs · comments · saves · best-performing format

Days 15–21 — Test What Resonates

Theme: Find what the market responds to.

- ☐ Add explicit "book" CTA to every post
- ☐ Reply to all comments < 2h
- ☐ Pin a how-to-start post

Goal: Turn attention into action · Output: Clear conversion path

Testing table — fill this in as you post:

Post	Format	Hook type	CTA	Result	Keep / improve / stop

Track: Which hook, format, and CTA earned the most response

Days 22–30 — Turn It Into a System

Theme: Build next month from what worked.

- ☐ Screenshot 28-day insights
- ☐ List top 3 + worst 2 posts
- ☐ Note what to stop

Goal: Measure & prepare review · *Output:* Review-ready data

Track: Best 3 posts · best hook · best CTA · best topic

Copy-and-Use Posting Toolkit

Never start from a blank screen. Everything here is tuned to your category and market.

HOOK STARTERS

The first line decides whether anyone reads the rest.

- Burlington businesses: if you're still doing {manual task} yourself, you're paying a 'time tax'—here's the AI workflow to remove it.
- Most small businesses in Halton are losing sales at {stage of funnel}... not because of ads, but because follow-up is slow. Want the fix?
- I watched {specific scenario common to ecom/service businesses}—and it takes {time} longer than it should. Here's how AI reduces it.
- Stop guessing your next follow-up message. This AI agent can generate {message types} based on what your customer already said.
- Your Instagram DMs are a goldmine—if you can respond fast. Here's a simple AI system for Burlington teams.
- Before you hire another VA, try this: automate {inbox/replies/lead capture} with an AI workflow that stays on-brand.
- If you're a coach/ecom shop in Burlington and you're posting but not converting, you likely have a {lead-to-sale} gap. Here's how to close it.
- The easiest way to save time with AI isn't 'chatbots'—it's workflows that trigger at {trigger}.

CAPTION FRAMEWORKS

Problem → Local context → Simple mechanism → Outcome

Burlington/ Halton small business owners: if follow-up takes hours, leads go cold. We set up an AI workflow that {what it does: captures intent, drafts replies, routes messages, updates a list}. Result: faster responses, more consistent follow-up, less manual work.

If you want this type of system, start here: <https://botlogix.ca>

Myth-busting → What to do instead → Quick example → Link-in-bio

Myth: You need a complex "AI chatbot" to get results. Truth: You need a reliable workflow for the moments that matter—DM replies, lead capture, and follow-up. Example: when someone

comments/DMs {keyword intent}, the agent drafts a reply + next-step message. Try a smarter system: <https://botlogix.ca>

Step-by-step carousel/case-style caption

Here's the 3-part system we build for small businesses using Instagram:

1. Capture intent (DM/comment → structured info)
2. Respond fast (on-brand draft + routing)
3. Follow up automatically (timed reminders + next message)

Want to see how this would work for your business? <https://botlogix.ca>

Community hook → Relatable pain → Offer via website → Low-friction curiosity

Quick question, Burlington: where do you lose leads most often? A) slow replies B) forgetting follow-up C) inconsistent messaging D) no clear process

Reply in the comments with A/B/C/D and we'll share the workflow pattern we usually start with. Learn more: <https://botlogix.ca>

Before/After format

Before: {pain: missed DMs, slow follow-up, manual copy/paste} After: {new: AI drafts replies, workflow routes, follow-up reminders trigger}

We focus on saving time while improving customer experience—built for small teams. See what we do: <https://botlogix.ca>

CTA LINES

- Book a free quote
- Book now — link in bio
- DM us or tap the link in bio to book.
- book

HASHTAG SETS

Rotate these — a tight, intentional set beats 30 generic tags.

Your Next Checkpoint

Re-measure on **June 27, 2026**. Growth on Instagram isn't one big leap — it's a monthly loop of act → measure → adjust. This is loop one.

What to measure in 30 days:

- Score movement (re-run this report)
- Follower growth
- Profile visits
- Website / link clicks
- DMs
- Post saves & comments
- Best format · best hook · best CTA

What success looks like in 30 days:

- Your profile clearly says who you help and where (Burlington)
 - Every post carries a local signal
 - Every post has a clear next step
 - You have 8–12 new content assets
 - You know which format earned the most response
 - You have a sharper plan for the next 30 days
-

Appendix — How This Was Built

Generated from a live analysis of @botlogix, 472 posts across the Marketing agency category, and 6 vetted, English-language competitor accounts scored for relevance and engagement.

- **Overall confidence:** 85/100 · **Validation:** passed (0 blocking, 2 warnings)
- **Method version:** instagram-intelligence-v1.1.0

Full discovery detail, evidence index, and per-section confidence live in the technical report (gold-master.md).
