Where You Are

The photograph of today — before anything changes.

BotLogix - AI Solutions on Instagram today

BotLogix - AI Solutions is doing less than half of what the data says is possible for a Marketing agency account in Burlington. The overall score of 44/100 reflects the gap between what's being posted and what's landing with the algorithm — and with real buyers.

Marketing agency competitors in Burlington are posting more consistently and tagging local audiences.

Where to focus

Overall score: 44/100. These five moves — executed in order — address the highest-leverage gaps in the data.

- 1 Post consistently for the next 30 days. Posts per week over the last 30 days is your highest-value gap at 25 points. The algorithm cannot rank an account it does not see. Start at three posts per week.

</div>

- 2 Add Burlington to your bio and hashtag set. Local Visibility scores 0/100. You are running a Burlington-based agency that is geographically invisible on the platform. A bio edit and a saved hashtag set including `#burlington` and `#burlingtonontario` close most of this gap immediately.

</div>

- 3 Study @rootsmarketingagency as a structural model. At 65,734 followers, they demonstrate what a marketing agency presence looks like at scale. Look at their post cadence, format mix, and how they talk about their service — not to copy, but to calibrate.

</div>

Where to focus (*continued*)

- 4 Show your own product working. Your offer is Instagram DM automation and AI agents. Demo posts of your own automations are content you can produce in under an hour and directly serve your stated goal of inbound DM leads.

</div>

- 5 Start collecting comment data. No comment data was collected in this audit, which means there is no read on what your audience actually responds to. Asking one question per caption fixes this within a week.

This report measures where you stand today at 44/100. The 30-day re-audit measures movement.

</div>

II

The Reality

What the data actually shows — no interpretation yet.

Score breakdown

Pattern analysis

Across 300 posts from comparable accounts in this category, the dominant content approach is description-led captions written in a mixed tone that blends educational, conversational, and promotional elements. That combination appears in the overwhelming majori

That combination appears in the overwhelming majority of posts — 195 of 300 use description as the primary hook, and 284 of 300 use mixed tone.

Audience voice: data gap

No comment data available for this audit period. This is common for newer accounts or those with comments turned off.

The 7-day plan in this report is designed to generate the first wave of audience language — questions, objections, and vocabulary — from real Burlington buyers. Run the audit again in 30 days.

Comment data was not available for this audit. To build this signal manually, read through any comments on your top 3 posts and note recurring questions or phrases. Then search your DMs for the questions you answer most often — those patterns are your content brief. For a business selling AI solutions to marketing teams, two questions almost always surface: - "How do we know if this actually works?" Consider a post addressing measurable outcomes your clients track. - "How long does setup take?"

Burlington visibility

Local visibility is your single lowest-scoring area — 0 out of 100 — and also your fastest path to improvement because every signal here is unfired and fixable today without any cost. Start with your bio. The words "Burlington" and "Ontario" appear nowhere in your profile. Adding "Burlington, ON" to your bio line earns an immediate signal that Instagram uses to surface local accounts in search. Ad

III

The Street Ahead

Where to go from here and what to do this week.

Highest-leverage actions

1	Start posting — at minimum 2x per week WHY IT MATTERS You have 0 posts in the last 30 days and a 0.00% engagement rate. The reference benchmark is 1.71 posts/week. There is nothing to measure until content exists.	HOW TO EXECUTE Draft and publish one post today. Schedule a second for later this week. Repeat. Even 2 posts/week puts you at benchmark parity.	SCORE IMPACT Content Performance +25pts (frequency), Competitor Gap +25pts	Medium
2	Add Burlington and Ontario to your bio WHY IT MATTERS Local Visibility is scored at 0/100 partly because your bio contains neither `burlington` nor `ontario`. This is a single-line text edit.	HOW TO EXECUTE Open your Instagram profile, tap Edit Profile, and add a line such as "Serving small businesses in Burlington, ON." Save.	SCORE IMPACT Local Visibility +20pts (bio signal)	Low
3	Add a CTA verb to your bio WHY IT MATTERS Your bio currently contains no call-to-action verb, which is costing points in the Sales Readiness sub-score (currently 46/100).	HOW TO EXECUTE Add a direct phrase to your bio such as "Book a free demo" or "DM us to automate your Instagram" followed by your link.	SCORE IMPACT Sales Readiness +20pts	Low

Highest-leverage actions *(continued)*

4 Tag Burlington as your post location on every new post WHY IT MATTERS Only 3 of your 50 posts carry a location tag. Location tagging is a discoverable signal for local audiences and accounts for 20pts in Local Visibility.	HOW TO EXECUTE When publishing, tap "Add Location" and select Burlington, Ontario before posting. Apply this to every post going forward.	SCORE IMPACT Local Visibility +20pts (location tag %)	Low
5 Add branded-local hashtags to every caption WHY IT MATTERS Zero posts currently use local hashtags, which is a 25pt gap in Local Visibility.	HOW TO EXECUTE Include tags such as `#BurlingtonON`, `#BurlingtonBusiness`, and `#HamOnt` in each caption or as a first comment. Build a saved set of 5-8 tags you can paste in under 30 seconds.	SCORE IMPACT Local Visibility +25pts	Low

Your first week

Day 1 — Fix What People See First

- Add "Burlington" or "Burlington, ON" to your bio. Open the app, tap Edit Profile, add the city. (5 min)
 - Add `#burlington` and `#burlingtonontario` to a saved hashtag set so they are ready to paste into every post going forward. (5 min)
-

Day 2 — Understand the Gap

- Your posting frequency is 0.00 posts per week over the last 30 days. Reference accounts in comparable markets average 1.71 posts per week. Block two recurring 30-minute slots on your calendar this week and next — one for drafting, one for posting. (15 min)
 - Write down three questions a Burlington small business owner would ask before buying an AI DM workflow. You have no comment data yet, so this becomes your content brief for Days 3 and 4. (15 min)
-

Day 3 — Draft Your First Post

Day 2 — Your past captions average 669 characters — the category average is 518. Aim for 400–500 characters this time. Cut anything that does not answer the question directly. (20 min)

- Select or photograph one image or graphic that illustrates the answer. No design tool required — a screenshot of a workflow, a before/after DM example, or a clean text graphic in Canva's free tier all qualify. (15 min)
-

Your first week (*continued*)

Day 4 — Assemble and Schedule

- Finalize the caption. Open with the question itself as the first line — it stops the scroll. Close with one clear call to action, such as "Send us a DM if this sounds familiar." (15 min)
 - Attach your hashtag set: your current tags plus `#burlington`, `#burlingtonontario`, and `#aimarketing`. Remove `#mobilemonkey` — it references a third-party brand and adds nothing to your positioning. (10 min)
-

Day 5 — Publish

- Post the content. Do it manually rather than scheduling so you can respond to any early comments in the first hour. Early engagement signals matter to reach. (10 min)
-

Day 6 — Engage

- Spend 20 minutes searching `#burlington` and `#burlingtonbusiness`. Leave three to five substantive comments on posts from local businesses. This builds local visibility without paid reach. (20 min)
-

Copy. Adapt. Post.

Four post templates, three hashtag sets, and three AI prompts — all pre-loaded with your business data. Copy, fill the brackets, and feed back into Claude or ChatGPT when you need more.

AI PROMPTS

Pre-filled for your business

Paste into Claude or ChatGPT. Get hooks, captions,
and content packages on demand.

1

THE WIN STORY

Build trust through proof

The single highest-impact content type for service businesses. One real client result, told specifically, does more than ten motivational posts.

Last week we helped a [client type] save [X hours / \$X / Y leads].

Before: [1-2 sentences describing the pain point]

What we built: [1-2 sentences describing the Instagram automation, AI agents, and DM marketing workflows for small businesses solution]

What it's doing now: [specific numbers]

If your week looks like that, send "AUTOMATE" in a DM.

When: Monday. Once per week. Builds trust and generates DMs.

2 THE QUESTION HOOK

Generate comments — and next-audit data

Questions drive comments. Comments become the audience language data the next audit mines for insight. Post one every mid-week.

What if your [business process] could run while you sleep?

Most Small business owners using Instagram for sales – e-commerce, service businesses, coaches I talk to do this manually. Three follow-up emails per lead, every day. By Friday, it's a part-time job nobody got hired for.

Here's what one Burlington client did differently: [1 sentence]

What's the one task you'd hand off first?

#burlingtonbusiness #aiautomation #smallbizburlington #productivity

When: Mid-week. The comments you get back are content for the next audit.

3

THE BEHIND-THE-SCENES

Show the work. Build personality.

Reference accounts in the Marketing agency category post this kind of content far more. It humanizes the offer and shows competence without claiming it.

Here's what we set up for a [client type] in Burlington this week:

→ [Specific automation 1]

→ [Specific automation 2]

→ [Specific automation 3]

Took us [time]. Will save them [hours/week].

Manual work compounds. Every week your team spends 4 hours on something a system could handle is 200 hours a year you can't get back.

When: Friday. Show the work week. Tag the city every time.

4

THE TOOL DEMO (REEL)

Show your product working in 30 seconds

Highest-engagement format for Marketing agency on Instagram. Screen recording + real numbers + one DM CTA.

HOOK (0-3s): "Watch this AI [action] in 30 seconds."

BODY (3-25s): Screen recording of the workflow.

Voiceover: "I gave it [input]. It returned [output]. The whole thing took [time]. Built for a [client type] in Burlington – runs [X times/day] in the background."

CTA (25-30s): "Send AUTOMATE in a DM."

Caption: [Restate demo + CTA + 8 hashtags including #burlingtonbusiness]

When: Bi-weekly. Highest-conversion format for this category in 2026.

Three sets. Rotate on every post.

My audience: Small business owners using Instagram for sales – e-commerce, service businesses, coaches. Best-performing hook type in my category: description

Best-performing tone: mixed

Best-performing post type: reel

Top content element: storytelling

Generate 10 Reel hooks (under 80 chars each) following these patterns. Feel native to Burlington small business audiences. Avoid AI-speak.

AI PROMPT

Write a Week of Captions

Five days of content in one prompt. Fill the brackets and you have a week's worth of posts.

I'm BotLogix - AI Solutions (Marketing agency, Burlington). Main offer: Instagram automation, AI agents, and DM marketing workflows for small businesses.

Write 5 Instagram captions for next week:

1. A customer win story
2. A behind-the-scenes work post
3. An educational post about [industry topic]
4. A local post that references Burlington
5. A soft offer post that drives DMs to Instagram automation, AI agents, and DM marketing workflows for small businesses

AI PROMPT

Turn a Client Win Into Content

Finish a project, fill the blanks, get a full content package.

I just finished a project for a [client type] in Burlington.
Problem: [pain point in 1-2 sentences]
Solution: [what was built]
Result: [outcome with numbers]
Turn this into:

1. A Reel script (hook + body + CTA + caption)
2. A 5-slide carousel (titles + caption + CTA)
3. A single-image caption (150 words + CTA)
4. Three Story prompts
