10 Checkpoints · day 30
What to measure and when to return.

START HERE

Your first-week checklist

Check these off before you read the rest. No scoring theory — just execution.

- ☐ **Add Toronto to your bio** — The bio currently contains no city reference, costing you points on two separate sub-scores simultan
- ☐ **Add a CTA verb to your bio** — The bio has no action word, so a visitor who is ready to act has no prompt to follow.
- ☐ **Tag a location on every post** — 0 of your 50 posts carry a location tag, which suppresses your reach in Toronto-based discovery.
- ☐ Comment on 5 local accounts (real replies, not spam)
- ☐ Save this page — check profile visits + DMs on day 7

Print or screenshot this page. Come back on day 7 to compare profile visits, saves, comments, and DMs.

HOW TO READ THIS

High-impact / low-effort moves come first. Knock out one move at a time — the detail and timing live on the sprint and Week 1 pages next.

Your 30-day plan

boxbuddyapp (@boxbuddyapp) · Toronto, Ontario ·

Today you post about **11.7/wk**. This plan targets **4 posts per week (add one Reel)** with copy-paste actions — not theory.

Weakest score today: Local — most of Week 1 focuses here. **Watch:** active accounts in your category (re-run discovery to surface them).

WEEK 1 · FIX THE FOUNDATION

Profile + local signals

- Day 1–2: Rewrite bio — what the app does, who it's for, one benefit, one CTA (download / link).
- Day 3: Save 3 Story highlights: Services, Proof, FAQ.
- Day 4: Publish one “before your next move, do this” carousel (5 slides).
- Day 5–7: Comment on 5 local business posts/day (real sentences, not emojis).

WEEK 2 · POST WITH A RHYTHM

Content that matches what competitors win with

- Post 3×: proof (before/after or testimonial), FAQ, behind-the-scenes.
- Use hashtag set from this deck on every post (8–12 tags).
- Add location tag + city name in first line of caption.
- Study one Reel from active accounts in your category (re-run discovery to surface them) — note hook + length, then publish yours.

Your first week

One action per day · **15–30 minutes** each · vertical timeline below.

Day 1 — Fix the Bio (8 min)

ACTION Add "Toronto" to your bio. The data shows your bio contains none of the checked local terms (`toronto`, `the 6ix`, `the 6`, `the six`), and city mentions carry a 20-point weight in your local score. One word closes that gap immediately.

EXAMPLE Add a CTA verb to your bio. Something like "Download free" or "Start your move" with your link. Right now your bio has no action prompt, another 20-point signal sitting unfired.

WHY Add a CTA verb to your bio. Something like "Download free" or "Start your move" with your link. Right now your bio has no action prompt, another 20-point signal sitting unfired.

Day 2 — Location Tag Every Existing Post (20 min)

ACTION Go into your 50 published posts and add a Toronto location tag to each one. Zero of your 50 posts carry a location tag, which is a 20-point gap. Instagram allows you to edit location after publishing. Work through them in batches of 10.

WHY Go into your 50 published posts and add a Toronto location tag to each one. Zero of your 50 posts carry a location tag, which is a 20-point gap. Instagram allows you to edit location after publishing. Work through them in batches of 10.

Day 3 — Audit Your Hashtag Set (15 min)

ACTION Your current set — `#boxbuddy`, `#movingtips`, `#movingapp`, `#boxbuddyapp`, `#organized`, `#movingday` — contains no Toronto-specific tags. Add `#TorontoMoving`, `#MovingInToronto`, and `#TorontoLife` to your working hashtag list. Keep your existing tags. These additions give local content a geographic surface area it currently lacks.

WHY Your current set — `#boxbuddy`, `#movingtips`, `#movingapp`, `#boxbuddyapp`, `#organized`, `#movingday` — contains no Toronto-specific tags. Add `#TorontoMoving`, `#MovingInToronto`, and `#TorontoLife` to your working hashtag list. Keep your existing tags. These additions give local content a geographic surface area it currently lacks.

Day 4 — Draft a Short Local Post (25 min)

ACTION Write a caption under 357 characters. Your captions currently average 456 characters, above the category average. Cut to the point. The post topic: one specific thing that makes moving within Toronto different from moving anywhere else — condo elevator bookings, TTC parking restrictions, whatever your users actually deal with. Mention "Toronto" by name in the caption body. Only 2 of your 50 posts do this, another 20-point signal.

EXAMPLE Add the location tag and your updated hashtag set before scheduling.

WHY Add the location tag and your updated hashtag set before scheduling.

Your first week (*continued*)

Day 5 – Publish and Note Baseline (5 min)

ACTION Publish the post from Day 4. Your current engagement rate is 0.00% across 0 measured posts. This post becomes your first data point. Screenshot the stats at 24 hours and 72 hours so you have something to measure against next week.

WHY Publish the post from Day 4. Your current engagement rate is 0.00% across 0 measured posts. This post becomes your first data point. Screenshot the stats at 24 hours and 72 hours so you have something to measure against next week.

Day 6 – Answer One FAQ in Stories (15 min)

ACTION No comment data exists to pull real questions from, so use format knowledge: what do people Google before a move? Pick one question, answer it in 3 plain sentences in a Story, and tag the Toronto location there too.

WHY No comment data exists to pull real questions from, so use format knowledge: what do people Google before a move? Pick one question, answer it in 3 plain sentences in a Story, and tag the Toronto location there too.

Day 7 – Review and Repeat (10 min)

ACTION Check the Day 5 post metrics. Note what engagement number you actually received. That number, whatever it is, replaces 0.00% as your new baseline.

WHY Check the Day 5 post metrics. Note what engagement number you actually received. That number, whatever it is, replaces 0.00% as your new baseline.

Where to add Toronto signals

Bio — city + offer + CTA

Captions — Toronto in line 1–2

Hashtags — 3 local tags every post

Instagram profile

Name · Bio · Link

Highlights · Posts · Reels

Location tag on posts

Reels — city on screen text

Geotags — every local post

Comments — 5 local accounts/week

Local score today: **21/100**. You are not invisible — you are under-labeled for Toronto, Ontario.

How you compare

Same category, real competitor posts. Use this to adjust rhythm — not to copy creative.

METRIC	YOU	MARKET AVG
Posts / week (30d)	11.7	~2+ typical
Avg caption length	456 chars	357 chars
Avg hashtags / post	13.8	5.4
Top format	reel	carousel

YOUR VOLUME IS NOT THE PROBLEM

At 11.7 posts/week you are posting plenty. Focus on hooks, saves/shares, and a clearer CTA rather than raising volume. Match caption discipline, keep the volume but sharpen hooks, positioning, and CTA, use the market's top format weekly, and make every post end in one clear CTA (download).

The market is moving

Instagram rewards accounts that look alive — recent posts, clear profile signals, visible local activity.

DATA NOT CAPTURED YET

We haven't locked in enough local competitor profiles for this market. Re-run the audit once discovery surfaces active Toronto, Ontario accounts and this board fills with live profiles, last-posted dates, and activity badges.

Who to watch – and what to steal

COMPETITOR DATA UNAVAILABLE

Competitor discovery did not return enough relevant accounts for this category. Re-run discovery with **moving, packing, storage, organization, decluttering, and home-inventory** search terms to populate this board with real moving-space peers.

HASHTAG ECOSYSTEM

Hashtag sets that support discovery

Hashtags will not save weak content, but they help Instagram understand **location**, **topic**, and **audience**.

LOCAL HASHTAGS

Where you operate — use on every post

- #NewPost
- #boxbuddyapp
- #ContentTest

RECOMMENDED DAILY MIX

3 local + 3 service + 2 audience + 2 authority. Swap 1–2 test tags each week. Avoid pasting the exact same 30 tags on every post.

Formulas you can reuse

Hook

"Most Toronto, Ontario businesses..." · "Before you hire a moving & home inventory app..." · "3 signs your feed..."

Caption

Problem → local example → fix → CTA

CTA

DM us · Book (link in bio) · Comment QUESTION · Save this

Formats

Local FAQ · Proof · Myth vs truth · Behind the work ·

Soft offer

Reels

Screen-record profile fix · "One thing I'd change" ·

Before/after bio

Carousels

5 local hashtags · 3 profile fixes · Client FAQ slides

Paste into ChatGPT

Copy any prompt below into ChatGPT. Edit the output in your voice before posting.

DAILY INSTAGRAM POST

Act as a social media strategist for a Toronto, Ontario moving & home inventory app called boxbuddyapp (@boxbuddyapp). Write one Instagram caption (under 120 words) for today. Use a clear hook, simple language, local angle for Toronto, Ontario, and end with a CTA to start a conversation.

CAROUSEL

Act as a social media strategist for a Toronto, Ontario moving & home inventory app called boxbuddyapp (@boxbuddyapp). Write a 5-slide carousel outline with headline per slide. Use a clear hook, simple language, local angle for Toronto, Ontario, and end with a CTA to start a conversation.

REEL SCRIPT

Act as a social media strategist for a Toronto, Ontario moving & home inventory app called boxbuddyapp (@boxbuddyapp). Write a 30-second Reel script with on-screen text suggestions. Use a clear hook, simple language, local angle for Toronto, Ontario, and end with a CTA to start a conversation.

LOCAL AUTHORITY POST

Act as a social media strategist for a Toronto, Ontario moving & home inventory app called boxbuddyapp (@boxbuddyapp). Explain one way a Toronto, Ontario business can improve local visibility on Instagram. Use a clear hook, simple language, local angle for Toronto, Ontario, and end with a CTA to start a conversation.

CLIENT PAIN-POINT POST

Act as a social media strategist for a Toronto, Ontario moving & home inventory app called boxbuddyapp (@boxbuddyapp). Address one common fear local business owners have about marketing on Instagram. Use a clear hook, simple language, local angle for Toronto, Ontario, and end with a CTA to start a conversation.

FAQ POST

Act as a social media strategist for a Toronto, Ontario moving & home inventory app called boxbuddyapp (@boxbuddyapp). Answer one frequently asked question your clients ask before buying. Use a clear hook, simple language, local angle for Toronto, Ontario, and end with a CTA to start a conversation.

When to measure

Early wins show up as profile visits, saves, comments, and DMs — not just followers.

1

7-day checkpoint

June 4, 2026

Measure: Profile visits, saves, comments, and DMs

Good: At least one local post published, bio updated, and 2+ meaningful interactions

Adjust: Tighten the hook, add a clearer CTA, or post on a different day/time

2

14-day checkpoint

June 11, 2026

Measure: Posting rhythm, reach on local posts, and repeat engagement

Good: 3+ posts in 14 days with consistent local hashtags and location tags

Adjust: Reuse the best-performing format and cut the weakest post type

3

30-day checkpoint

June 27, 2026

Measure: Follower trend, profile visits, saves, shares, DMs, and local reach

Good: Higher profile visits or DMs even if follower growth is still modest

Adjust: Run the same audit again and compare score movement by category

METRICS TO WATCH

Profile visits · Follows · Saves · Shares · Comments · DMs · Reach on local posts · Reel watch time (if available)

Your monthly check-in

Save this workbook. Execute the sprint. On **June 27, 2026**, run the same analysis again — we compare scores, competitors, hashtags, and what actually moved.

30

DAYS TO NEXT AUDIT

June 27, 2026

TARGET REVIEW DATE

BRING THESE TO YOUR REVIEW

- Profile visits, reach, saves, shares, comments, DMs (28-day trend)
- Your 3 best posts + 2 worst — what was different?
- Which fixes from this deck you completed (check tear-off sheet)
- Any new competitor accounts you noticed locally

WHY BUSINESSES COME BACK EVERY MONTH

Instagram shifts weekly. Competitors post. Hashtags change. A monthly BotLogix review turns guessing into a system: fresh data, updated leaderboard, new copy-paste actions. *(Subscription pricing is coming — your first audit is the baseline.)*

Prepared for **boxbuddyapp**. Pin **June 27, 2026** on your calendar — that is when this document pays off twice.

WHAT TO DO NEXT

Your workbook in one glance

You do not need to understand Instagram analytics. Follow this workbook for 30 days, then come back on **June 27, 2026**.
